2.Project Title: Server Configuration and Management

Configure and manage Windows Server or Linux server as the main server for a network.

Objective:

Configure and manage Windows Server or Linux server as the main server for a network.

Project Details/Guidelines:

- Install and configure DNS, DHCP, and Active Directory.
- Set up file-sharing services (e.g., SMB, NFS).
- Implement user management and permissions.
- Perform regular backups and restore configurations.

Assessment Criteria

This assignment carries **100** marks and contributes **35%** to the total mark of this module. The following table breaks down the specific marking Criteria to be used for this particular assignment.

CRITERIA	MARKS
Virtualization	30
Network connectivity	10
Service functionality	10
Configuration	20
Testing & Verification	30
Total	**100**

SUBMISSION INSTRUCTIONS

- Submit the lab environment for verification and a written report to supplement the lab
- Use the following format for the documentation/report:
  - Font Type: Tahoma
  - Font Size: 12
  - Line Spacing: 1.5
  - Alignment: Justify

Note: Please adhere to the university's policies on academic integrity and plagiarism when completing this assignment.
